FAQ

---

It has the ability to do a lot of things so you. Hydra - free download for windows and Os x.. windows users enjoy a wide range of features on their favorite operating systems.. Windows.Q: PHP and MySQL login form redirects to homepage instead of processing the form I have the following form in a local website which checks the username and password: username: password: Log In I'm testing it and it works fine. When I click submit the action is redirecting me to: And when I submit a username and password the form is completely empty. I can not see the form fields, I don't have any other action and the process.php is empty. I have the following in my PHP code: Invalid username and password."; } } ?> I have no idea what's causing this. Please help! A: Here is your problem: 82157476af
